

BCA Hub Portal - Project Documentation

1. Project Overview

BCA Hub Portal is a web application for BCA students providing semester-wise notes, previous year papers, projects, interview preparation, aptitude, GD, resume guidance, roadmap, internship resources and downloadable study material.

2. Objectives

Provide a single platform for academic resources and placement preparation.

3. Technology Stack

Frontend: React, Tailwind CSS. Backend: Node.js, Express.js. Database: MongoDB. Version Control: Git & GitHub.

4. Features

Home page, Notes, PYQ, Projects, Interview, Aptitude, HR, Technical, GD, Resume, Roadmap, Download/View PDFs, Responsive UI.

5. Folder Structure

src/pages, components/layout, data, routes, public/notes, public/docs, public/zip.

6. Installation

Install Node.js, run npm install, then npm run dev.

7. Future Scope

Authentication, Admin Panel, Search, Bookmarking, AI Assistant, Progress Tracking.

8. Conclusion

The portal centralizes learning resources and helps students prepare for academics and placements.
