

BCA 6th Semester - Cloud Computing Notes (PRSU)

Unit 1

Introduction to Cloud Computing: definition, characteristics, service models (IaaS,PaaS,SaaS), deployment models (Public, Private, Hybrid, Community), advantages and limitations.

Unit 2

Virtualization: Hypervisor, Virtual Machines, Containers, resource allocation, storage and networking basics.

Unit 3

Cloud Services: Compute, Storage, Database, Load Balancing, Auto Scaling, Security basics, IAM.

Unit 4

Cloud Security: authentication, authorization, encryption, backup, disaster recovery, SLA.

Unit 5

Applications: Cloud in education, business, healthcare, IoT, AI. Important interview and exam questions.

Important Questions

- Define Cloud Computing and explain its characteristics.
- Differentiate IaaS, PaaS and SaaS.
- Explain Public, Private and Hybrid Cloud.
- What is virtualization? Explain Hypervisors.
- Discuss cloud security challenges.
